FLUID FILM "AS" & "NAS" LUBRICANTS, PENETRANTS, & CORROSION PREVENTATIVE

Belongs to a family of **FLUID FILM** products that are Environmentally Friendlier, Solvent Free, Non-Toxic, long lasting, thixotropic liquids that have been used for over fifty (50) years in the highly corrosive marine environment of ships and offshore drilling rigs. More recently products have been introduced and successfully utilized in the aerospace, aircraft and automobile industries as well as for home maintenance. Facilities where they are used include the following: Government facilities, commercial fishing concerns, gas companies, agriculture, salt plants, municipal plants, power plants, manufacturing plants and pulp and paper mills.

FLUID FILM "AS" & "NAS" are formulated from specially processed wool-wax, highly refined petroleum oils and selected agents to provide corrosion control, penetration, metal wetting and water displacement. These long lasting products contain no solvents, will not dry out and will penetrate through rust to the base metal, providing corrosion protection from both natural and industrial atmospheres. Heavily corroded and/or frozen parts such as nuts, bolts, shafts, etc., that would normally be damaged during maintenance, can be salvaged by applying FLUID FILM.
